FORENSIC TECHNOLOGY AND CONSULTING
Data Departure Program

Nearly 80% of employees take sensitive data with them when they leave their jobs. Do you know what information escapes your company when employees join a competitor or start their own business?

PREVENT
the loss of sensitive information with effective controls and rapid identification of theft attempts.

PREPARE
complete forensic preservations, documented analyses, and executed chain-of-custody forms.

TAKE ACTION

10011 0110

REDUCE
burdens faced by your IT and Legal departments through cost-effective, repeatable outsourcing.

BOOST
turnaround times and storage capacity by quickly recycling hardware after employees depart.

Data Protection Program for Employee Departures

IDENTIFICATION, IMAGING, AND PRESERVATION
Create forensic preservation images of computers, devices, and all other data repositories accessible to departing employees.

PRELIMINARY FORENSIC ANALYSIS AND REPORTING
Identify "red flags" in computer access logs, time stamps, USB history, internet history, lists of deleted files, and trash bins.

COMPREHENSIVE FORENSIC ANALYSIS AND REPORTING
Investigate flagged cases that show potential theft and report all breaches including sensitive data.

EXPERT CONSULTING AND LITIGATION TESTIMONY
Protect against data breaches by customizing technical and administrative controls, and support data misappropriation cases with expert testimony.

DATA REMEDIATION AND HARDWARE WIPING
Remediate misappropriated data from a competitor's infrastructure, and internally recycle hardware immediately following forensic preservation.
