Digital force majeure

Effekten av no-code på digitalisering innen juridiske tjenester – med praktiske eksempler fra Virke

Marius Tuft – CEO (Appfarm)

Magnus Kræmer – Leder Arbeidsrett SMB (Virke)

Thomas Trier – Leder Digitalisering og IT (ex-Virke)
VIRKE

appfarm

"Legal technology budgets will increase threefold through 2025"

Gartner

appfarm

Why?

Why the legal industry is going digital

Highly skilled legal professionals are spending too much time on repetitive tasks deteriorating service levels

Clients' standards and requirements are increasing when it comes to digital experiences

Innovative legal organizations are stealing clients and talent through the usage of technology

appfarm

The digital dilemma challenging enterprises

Off-the-shelf Software-as-a-Service

+ Modern and constantly updated
Ease of deployment

- One size doesn't fit all
Not integrated with existing setup

VS

Custom software development

+ Tailored to your processes and systems
Source of competitive edge

- High initial price and long development time
Unpredictable maintenance cost

appfarm

How can no-code help

Best of both worlds:
Tailored Software-as-a-service

appfarm

Rapidly create tailored enterprise apps and manage them painlessly

1. **Innovative technology** to rapidly build enterprise software – *without coding*

2. **Delivered as a service,** including application life cycle management

appfarm

Appfarm Create: High-performance No-code

Design your application

Drag and drop stunning user interface backed by Google Material Design

Select your data model

Visually compose your data model without any database knowledge

Arrange application flow

Connect user interface and data together the way you want it.

One click deploy. Literally

We have a big blue button. Push it, and by magic, have the latest version.

appfarm

Why go no-code

Speed	Visual drag-and-drop development – 10X faster
One-stop-shop	Full-stack, cloud-native with one-click deploy
All devices	Interfaces tailored to distinct user groups and use cases
Integrate with everything	Create new capabilities extending existing setup
No technical debt	Continous upgrades with new technology, security and compatability

appfarm

"**70% of all new business applications will be built with no- and low-code tools by 2024**"

Gartner

appfarm

How does no-code create value in the legal sector

Process efficiency

Optimize process efficiency and resource management across various legal work processes (e.g., due diligence processes)

Client management

Client portals for onboarding, management and reporting

Client relationship management and nurturing of past and prospective clients

Workflow automation

Customize assignment workflow automation and reporting, integrated with legacy systems and back-office operations

Gen AI

Integrate generative AI functionality into internal tools and client-facing digital experiences

Digital legal services

Create innovative digital experiences for clients

Customers and partners

VÍRKE

- Virke er hovedorganisasjonen for handels- og tjenestenæringen og er bindleddet mellom arbeidsgiverne og myndighetene

- Virke er en medlemsbasert organisasjon som blant annet tilbyr sine medlemmer juridisk rådgivning, skreddersydd analyse, bransjefellesskap og bedre rammevilkår gjennom vår politiske påvirkning

- Virke sine jurister er eksperter på arbeidsrett og tilbyr også sine medlemmer forretningsjuridisk bistand

appfarm

Two examples from Virke

Leveraging no-code for digital innovation and transformation

1 **Arbeidsgiverguiden:**
New digital product: Gamifying the law

2 **Virke Sak:**
Digital case management system for legal advisory services to members

appfarm

Virke Sak

Digital case management system for legal advisory services to members

Magnus Kræmer
Leder Arbeidsrett SMB

Thomas Trier
Leder Digitalisering og IT
(until Sept 2023)

appfarm

Why invest in a digital case management system?

Efficiency and scalability
Move from manual to digital process to increase efficiency and scalability of current operations

Reduce person dependency
Collect structured data about all case management to reduce dependence on individual case workers

Become data driven
Continuously collect data on case management process to optimize operations

Leverage other data and knowledge sources
Connect the system to existing systems (CRM) to confirm eligibility and leverage existing services
 (e.g., Arbeidsgiverguiden)

Member self-service
Allow member to self-register new cases and see status on existing cases
