iCOMPLi
by LegalRM

A powerful and intuitive information governance platform for inhouse teams

Be compliance confident

Stay ahead of legal and regulatory requirements. iCompli's information governance platform helps to ensure compliance with data protection laws, reducing risks to your business.

Mitigate risk

Safeguard your organisation against data breaches and non-compliance risks.

Be litigation ready

Proper data management ensures quick and accurate retrieval of relevant information for e-discovery, litigation support and litigation holds.

Enhance efficiencies and save costs

Efficient information governance practices streamline data storage and helps to automate retention policies and workflows, enabling in-house teams to work more efficiently with the rest of the business.

Safeguard sensitive information

Strong data management practices support overall corporate hygiene, reinforcing customer confidentiality and trust.

Harness data for better decisions

iCompli's information governance platform allows in-house legal teams to access valuable analytics about their data assets, supporting informed decision-making for the enterprise.

iCompli seamlessly integrates with your core applications and repositories to provide **full visibility of your information asset universe**

To help you **manage compliantly and efficiently the lifecycle of all digital and physical assets**

And is delivered by our **World class project delivery team**
